Elizabeth Garcia-Quilinquin

Full Stack Developer with experience in astronomy outreach to better build a web experience for the public in technology. Recently earned a certificate in Full Stack Developer at the University of Oregon, and prior knowledge of coding with the University of Hawaii Astronomy program. Some skills developed from the University of Oregon include: Javascript/jQuery, Web API, NodeJS, ES6. Known as a fast learner, I can pick up new skills and knowledge in an ever-fast-growing field like technology. My attention to detail helps with debugging code very quickly and precisely when combing through files. I've worked individually and in a group, to solve issues: I debug my code and pinpoint errors in my work and to help others debug project code. With my experience as a developer, I someday want to create new apps or computer applications that make a UI experience better education tools on the web.

APPLICATIONS

Burger App — *https://stark-gorge-80987.herokuapp.com/*

This app connects to a database and gives a user access to add to the database on an HTML page.

- HTML, CSS, Javascript, jQuery, Font Awesome, MySQL, Bootstrap, Heroku

Weather Forecast — *https://equilinquin.github.io/Weather-Forecast/*

This app connects to an API that renders weather data for a city selected.

- HTML, CSS, Javascript, Bootstrap, API

StarGazer — *https://limitless-atoll-63723.herokuapp.com/*

This app creates and logs users in, and to make searches of 88 constellations. Future development will ensure individual user experience.

- HTML, CSS, Javascript, Bootstrap, jQuery, Node, NPM, MySql, Heroku
